

All approved transactions will be settled into the charity bank account 3 working days after the transaction is approved. This cycle is called transaction day +3 (T+3).

AIBMS will direct debit the transaction processing charges monthly 14 days after issuing the statement.

The charity can access near real time data via CreditCall WebMIS. The donations will upload to CreditCall WebMIS provided that the device is online, has at least x3 bars of signal so it can connect to MyPayter.

The charity can also access all AIBMS statements by viewing the Insights Portal. This portal shows all cleared funds, settlement batches and merchant statements.

Note: The Payter device is an offline device. It does not capture real time authorisation requests

When a card is presented to the device it will always say 'card type accepted, thank you for your donation' unless an unsupported card type is presented.

Authorisation result now visible in CreditCall WebMIS.

A real time authorisation is obtained during stages 3-5 this takes less than 2 seconds to complete.
