CharityClear - our ethical gateway

LibertyPay is a specialised debit and credit card provider in the Corporate, Charity and Not for Profit sectors. We recognised a need for a bespoke online payment solution for all organisations that did more than just process payments.

In 2017 we acquired CharityClear and have been working to develop and expand the solution for the benefit of charities and the wider community.

Whether you need a Virtual Terminal (VT) to take telephone donations securely and in a PCI compliant manner, or Pay by Link (PBL) to send donation asks to supporters, perhaps you sell merchandise on your website and need to accept payments, or maybe you want to take donations or simply have a Donate Now button / Pay Now Button, CharityClear can help.

CharityClear is an ethical payment gateway which means that the profit generated by this service is donated to charity. Our chosen charity for 2020 is CALM, Campaign Against Living Miserably, providing support to anyone who is struggling or in crisis.

By using CharityClear you can be confident that not only are you receiving a PCI Level 1 Compliant Payment Gateway Solution, you are also contributing to good causes.

Gateway Capabilities

Mail Order / Telephone Order

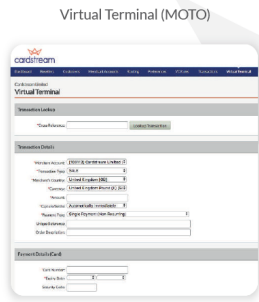

Mail Order / Telephone Order

Taking telephone payments has never been easier using the CharityClear virtual terminal. Simple to set up, our virtual terminal enables you to take payments over the phone and manage them through our Merchant Management System (MMS).

Offer your customers a new way to pay with a virtual terminal. With quick, easy processing, our virtual terminal eliminates the need for an actual terminal, which frees up your telephone line.

Immediate Response

You don't need to wait for authorisation. With CharityClear you receive immediate confirmation of your payment.

Found within the Merchant Management System.

Allows the Merchant to enter card details provided over the telephone.

May also be used to initiate refunds, recurring, pre-authorised and verify transactions.

Interactive Voice Response (IVR)

Software technology that allows a computer to interact with humans through the use of voice and DTMF tones via a keypad. Its use is popular in call centres.

PayByLink

LibertyPay's rates also include our PayByLink function. This function enables you to integrate a PayNow button in your website, by which you can then send a link direct to your customers' email accounts for a smooth, fast transaction.

This feature also enables you to send e-invoices via email link or a QR Code for payment.

The advantage of Pay Button is that it offers the functionality of our Gateway without having to complete a Hosted or Direct Integration, meaning it can be included in basic HTML without the need for any scripting languages.

PayByLink is fast becoming a popular way of accepting payments because of its ease and additional security.

Pay Button / Link / QR Code

The Pay Button function provides the Merchant with the ability to create an HTML link that can be embedded into HTML content (eg website or HTML email). When clicked, it will allow a payment to be taken via the hosted form that will be pre-populated with the data specified when creating the link within the Merchant Management System.

A QR Code may also be generated using this method.

Fraud Screening

LibertyPay takes fraud seriously by helping to protect your business from fraudsters using all available security measures, to include:

- Address Verification (AVS) – Matching the address that is given at the point of transaction with the address registered with the card issuer
- Security Code (CV2) - Checking the 3 or 4-digit code on the back of the card with the card issuer's database
- IP address checking - Checking where the transaction is coming from
- 3D-Secure - Checking whether the customer has entered their unique authentication correctly

Recurring Transactions

The design and functionality of our system is hugely important to us, so it has been developed to make regular transactions as simple as possible. You can easily set up scheduled and repeat transactions for returning customers using our MMS, helping to maintain steady cash flow.

Integration

The CharityClear gateway has 2 main integration methods:

- Direct Integration – a safer and more customer-friendly and intuitive e-commerce solution
- Hosted Payment Form – the most robust solution for PCI Compliance taking the customer to a hosted page that then redirects to your website post transaction

CharityClear - Pricing Options

Package	Monthly Fee	Set Up Fee	Inclusive Transactions	Transaction Fee %	Per Transaction Fee (p)
A	£0.00	£0.00	Zero	2.99% (All transactions)	£0.20
